SUMMARY

Entry-level developer looking to bring skills to a new sector. Experience gained through recently completed course including certifications and development of two real-world projects. I am hard working, adaptable, and enjoy learning as much as I can in whatever work I am doing. I will also bring my six years face-to-face customer service, training and management experience to any new role.

EXPERIENCE

Coding Traineeship - Full Stack Developer

IT Career Switch

June '23 - Sept '24

Certifications and self-led coursework projects completed under guidance of tutor.

- Portfolio Project: "Gazetteer"
 - An interactive web app designed with a focus on "mobile-first" development. The app makes extensive use API's to retrieve relevant information about any country. I used a number of jQuery's AJAX functions to call PHP routines, using cURL to retrieve information from a varied source of API's, and then formatted the JSON response to display the result in the desired modals.
- Portfolio Project: "Company Directory"
 - A web application designed to manipulate a database of employee information (personnel, departments, and location) with "mobile-first" in mind. The interface allows for the user to retrieve and manipulate data through backend request, then displayed in the front end. I used XAMPP Apache Server and phpMyAdmin for the creation of the company directory table, and jQuery's Ajax functions to call PHP routines to interact with the database.

WORK EXPERIENCE
